

Security Incident Report

Incident ID: inc_1f5ec9d7

Attack Type: Broken Auth

Status: open

Risk Score: 85%

Confidence: 98%

Created: 2026-08-08 05:34:57.278516

Telemetry

Source IP	127.0.0.1
Endpoint	/target/auth/login
Method	POST
User Agent	python-httpx/0.28.1
Timestamp	2026-08-08 05:34:57.269273

AI Reasoning

- Honeytoken credential was accessed from an external IP address.
- Request targeted an internal-only placement path.
- User agent indicates automated scanning behavior.

Business Impact: Automated analysis indicates unauthorized access to a decoy asset with elevated risk.

Recommendations

- rotate_credential — pending
- block_source_ip — pending

AI Investigation Trail

- **coordinator** (completed): Orchestrated investigation
- **telemetry** (completed): Telemetry from 127.0.0.1 on /target/auth/login
- **threat_intel** (completed): Broken Auth
- **reasoning** (completed): 1. Honeypot credential was accessed from an external IP address. 2. Request targeted an internal-only placement path.
- **containment** (completed): [{'action': 'rotate_credential', 'status': 'pending'}, {'action': 'block_source_ip', 'status': 'pending'}]
- **security_advisor** (completed): Automated analysis indicates unauthorized access to a decoy asset with elevated risk.
